PrepPilot — Readable Expanded Syllabus

Every chapter/topic is intentionally wrapped into multiple lines and bullet points. No single-line topic dumps.

JEE Main 2026

Mathematics

Sets, Relations and Functions

- sets
- union
- intersection
- complement
- power set
- relations
- equivalence relations
- functions
- one-one
- into
- onto
- composition

Complex Numbers and Quadratic Equations

- complex numbers as ordered pairs
- a+ib
- Argand diagram
- algebra
- modulus
- argument
- quadratic equations
- roots
- coefficients
- nature of roots
- formation from roots

Matrices and Determinants

- matrices
- operations
- types
- determinants 2x2/3x3
- evaluation
- triangle area
- adjoint
- inverse
- consistency
- simultaneous linear equations

Permutations and Combinations

- fundamental counting principle
- permutations
- combinations
- P(n,r)
- C(n,r)
- applications

Binomial Theorem

- positive integral index
- general term
- middle term
- applications

Sequence and Series

- AP
- GP
- insertion of AM/GM
- AM-GM relation

Limit, Continuity and Differentiability

- real functions
- algebra of functions
- polynomial/rational/trigonometric/log/exponential functions
- inverse functions
- graphs
- limits
- continuity
- differentiation
- product/quotient/sum/difference
- trig/inverse trig/log/exponential/composite/implicit derivatives
- second derivatives
- rate of change
- monotonicity
- maxima/minima

Integral Calculus

- anti-derivative
- algebraic/trigonometric/exponential/log integrals
- substitution
- parts
- partial fractions
- trig identities
- fundamental theorem
- definite integrals
- area bounded by curves

Differential Equations

- ordinary differential equations
- order
- degree
- separation of variables
- homogeneous equations
- linear first-order equations

Coordinate Geometry

- Cartesian coordinates
- distance
- section
- locus
- slope
- parallel/perpendicular lines
- intercepts
- line equations
- intersections
- angles
- concurrence
- distance point-line
- triangle centres
- circle
- parabola
- ellipse
- hyperbola

Three Dimensional Geometry

- coordinates
- distance
- section
- direction ratios/cosines
- angle between lines
- line equation
- skew lines
- shortest distance

Vector Algebra

- vectors/scalars
- addition
- components in 2D/3D
- scalar product
- vector product

Statistics and Probability

- dispersion
- mean
- median
- mode
- standard deviation
- variance
- mean deviation
- event probability
- addition/multiplication
- Bayes theorem
- random-variable distribution

Trigonometry

- trig identities/functions
- inverse trig functions
- properties

Physics

Units and Measurements

- units
- SI
- fundamental/derived units
- least count
- significant figures
- errors
- dimensions
- dimensional analysis

Kinematics

- frame of reference
- straight-line motion
- speed/velocity
- uniform/non-uniform
- average speed
- instantaneous velocity
- acceleration
- position-time and velocity-time graphs
- relative velocity
- projectile
- circular motion

Laws of Motion

- force/inertia
- Newton I/II/III
- momentum
- impulse
- momentum conservation
- concurrent-force equilibrium
- static/kinetic friction
- rolling friction
- centripetal force
- level/banked road

Work, Energy and Power

- constant/variable force work
- kinetic/potential energy
- work-energy theorem
- power
- spring energy
- mechanical-energy conservation
- conservative/non-conservative force
- vertical circle
- elastic/inelastic collisions
- 1D/2D collisions

Rotational Motion

- centre of mass
- rotation concepts
- moment/torque
- angular momentum
- conservation
- moment of inertia
- radius of gyration
- parallel/perpendicular axes
- rigid-body equilibrium/rotation
- linear vs rotational

Gravitation

- universal law
- g variation with altitude/depth
- Kepler
- gravitational potential/energy
- escape velocity
- satellites
- orbital velocity
- period
- energy

Properties of Solids and Liquids

- elasticity
- stress/strain
- Hooke law
- Young/bulk/rigidity moduli
- pressure
- Pascal law
- viscosity
- Stokes
- terminal velocity
- streamline/turbulent
- Bernoulli
- surface tension
- capillary rise
- heat
- expansion
- specific heat
- calorimetry
- phase change
- latent heat
- conduction
- convection
- radiation

Thermodynamics

- thermal equilibrium
- temperature
- zeroth law
- heat
- work
- internal energy
- first law
- isothermal
- adiabatic
- second law
- reversible/irreversible

Kinetic Theory of Gases

- perfect-gas equation
- compression work
- assumptions
- pressure
- kinetic temperature
- RMS speed
- degrees of freedom
- equipartition
- specific heats
- mean free path
- Avogadro number

Oscillations and Waves

- periodic motion
- time period
- frequency
- SHM
- phase
- spring
- SHM energy
- pendulum
- waves
- longitudinal/transverse
- progressive waves
- superposition
- reflection
- standing waves
- strings
- organ pipes
- harmonics
- beats

Electrostatics

- charge/conservation
- Coulomb
- multiple charges
- superposition
- continuous distribution
- field
- field lines
- dipole
- torque
- flux
- Gauss law
- line/plane/spherical shell
- potential
- potential difference
- equipotential
- potential energy
- conductors
- dielectrics
- polarisation
- capacitance
- capacitor combinations
- parallel plate
- dielectric
- energy

Current Electricity

- drift velocity
- mobility
- Ohm law
- resistance
- I-V
- energy/power
- resistivity/conductivity
- resistor combinations
- temperature dependence
- internal resistance
- potential/EMF
- cells
- Kirchhoff
- Wheatstone
- metre bridge

Magnetic Effects of Current and Magnetism

- Biot-Savart
- circular loop
- Ampere
- straight wire
- solenoid
- Lorentz force
- current conductor
- parallel currents
- ampere definition
- torque
- galvanometer
- sensitivity
- ammeter/voltmeter
- magnetic dipole
- bar magnet
- axis/perpendicular-axis fields
- magnetic materials
- temperature

Electromagnetic Induction and Alternating Currents

- Faraday
- induced EMF/current
- Lenz
- eddy currents
- self/mutual inductance
- AC peak/RMS
- reactance
- impedance
- LCR
- resonance
- power
- wattless current
- generator
- transformer

Electromagnetic Waves

- displacement current
- properties
- transverse nature
- spectrum from radio to gamma
- applications

Optics

- reflection
- spherical mirrors
- mirror formula
- refraction
- thin lens
- lens maker
- TIR
- magnification
- power
- lens combinations
- prism
- microscope
- telescope
- wavefront
- Huygens
- interference
- Young double-slit
- fringe width
- coherence
- diffraction
- central maximum
- polarisation
- Brewster
- Polaroids

Dual Nature of Matter and Radiation

- dual nature
- photoelectric effect
- Hertz/Lenard observations
- Einstein equation
- particle nature
- matter waves
- de Broglie

Atoms and Nuclei

- alpha scattering
- Rutherford
- Bohr
- energy levels
- hydrogen spectrum
- nuclear composition/size
- atomic masses
- mass-energy
- mass defect
- binding energy
- fission
- fusion

Electronic Devices

- semiconductors
- diode I-V
- rectifier
- LED
- photodiode
- solar cell
- Zener
- voltage regulator
- OR/AND/NOT/NAND/NOR

Experimental Skills

- vernier
- screw gauge
- pendulum
- metre scale moments
- Young modulus
- surface tension
- viscosity
- sound resonance tube
- specific heat
- metre bridge
- Ohm law
- galvanometer
- focal length
- prism deviation
- refractive index
- p-n junction
- Zener
- component identification

Chemistry

Some Basic Concepts in Chemistry

- matter
- Dalton
- atom/molecule/element/compound
- laws of combination
- atomic/molecular mass
- mole
- molar mass
- percentage composition
- empirical/molecular formula
- equations
- stoichiometry

Atomic Structure

- EM radiation
- photoelectric effect
- H spectrum
- Bohr
- energy/radius
- limits
- dual nature
- de Broglie
- uncertainty
- quantum model
- orbitals
- quantum numbers
- orbital shapes
- spin
- Aufbau
- Pauli
- Hund
- configuration

Chemical Bonding

- Kossel-Lewis
- ionic bonding
- lattice enthalpy
- covalent bonding
- electronegativity
- Fajan
- dipole
- VSEPR
- shapes
- VBT
- hybridisation
- resonance
- MO theory
- LCAO
- sigma/pi
- bond order/length/energy
- metallic bonding
- H-bond

Chemical Thermodynamics

- system/surroundings
- extensive/intensive
- state functions
- entropy
- first law
- work
- heat
- internal energy
- enthalpy
- heat capacities
- Hess law
- bond dissociation
- combustion
- formation
- atomisation
- sublimation
- phase transition
- hydration
- ionisation
- solution enthalpy
- second law
- spontaneity
- Gibbs

Solutions

- molality
- molarity
- mole fraction
- percentage
- vapour pressure
- Raoult
- ideal/non-ideal
- colligative properties
- molar mass
- abnormal values
- van't Hoff factor

Equilibrium

- physical equilibrium
- Henry law
- chemical equilibrium
- mass action
- Kp/Kc
- Gibbs relation
- factors
- Le Chatelier
- weak/strong electrolytes
- acid/base theories
- ionisation
- pH
- common ion
- hydrolysis
- Ksp
- buffers

Redox Reactions and Electrochemistry

- oxidation/reduction
- oxidation number
- balancing
- conduction
- molar conductivity
- Kohlrausch
- electrolytic/galvanic cells
- electrode potentials
- EMF
- Nernst
- Gibbs relation
- dry cell
- lead accumulator
- fuel cell

Chemical Kinetics

- rate
- concentration/temperature/pressure/catalyst effects
- elementary/complex
- order
- molecularity
- rate law
- zero/first order
- half-life
- Arrhenius
- activation energy
- collision theory

Classification and Periodicity

- modern periodic law
- table
- electronic configuration
- atomic/ionic radius
- ionisation enthalpy
- electron-gain enthalpy
- valence
- oxidation state
- electronegativity
- reactivity

Hydrogen

- position
- occurrence
- isotopes
- preparation
- properties
- uses
- hydrides
- water
- heavy water
- hydrogen peroxide
- fuel

s-Block Elements

- Groups 1/2
- trends
- compounds
- reactions

p-Block Elements

- Groups 13-18
- configuration
- trends
- compounds
- reactions

d- and f-Block Elements

- transition elements
- oxidation states
- complexes
- catalysis
- magnetic behaviour
- lanthanoids
- actinoids
- applications

Coordination Compounds

- Werner
- terminology
- nomenclature
- isomerism
- bonding
- stability
- applications

Organic Chemistry Principles

- IUPAC
- structural/stereo isomerism
- purification
- analysis
- electronic effects
- intermediates
- reaction types

Hydrocarbons

- alkanes
- alkenes
- alkynes
- aromatic hydrocarbons
- preparation
- reactions

Organic Compounds Containing Halogens

- haloalkanes
- haloarenes
- C-X bond
- preparation
- substitution
- elimination
- polyhalogen compounds

Alcohols Phenols and Ethers

- classification
- nomenclature
- preparation
- physical properties
- reactions
- phenol acidity
- ethers
- uses

Aldehydes Ketones and Carboxylic Acids

- nomenclature
- carbonyl structure
- preparation
- physical properties
- reactions
- carboxylic acid structure
- preparation
- properties
- reactions
- uses

Amines

- structure
- classification
- nomenclature
- preparation
- properties
- reactions
- diazonium salts
- synthesis use

Biomolecules and Polymers

- carbohydrates
- proteins
- enzymes
- vitamins
- nucleic acids
- polymers

NEET UG 2026

Physics

Units and Measurements

- units
- SI
- fundamental/derived units
- least count
- significant figures
- errors
- dimensions
- dimensional analysis

Kinematics

- frame of reference
- straight-line motion
- speed/velocity
- uniform/non-uniform
- average speed
- instantaneous velocity
- acceleration
- position-time and velocity-time graphs
- relative velocity
- projectile
- circular motion

Laws of Motion

- force/inertia
- Newton I/II/III
- momentum
- impulse
- momentum conservation
- concurrent-force equilibrium
- static/kinetic friction
- rolling friction
- centripetal force
- level/banked road

Work, Energy and Power

- constant/variable force work
- kinetic/potential energy
- work-energy theorem
- power
- spring energy
- mechanical-energy conservation
- conservative/non-conservative force
- vertical circle
- elastic/inelastic collisions
- 1D/2D collisions

Rotational Motion

- centre of mass
- rotation concepts
- moment/torque
- angular momentum
- conservation
- moment of inertia
- radius of gyration
- parallel/perpendicular axes
- rigid-body equilibrium/rotation
- linear vs rotational

Gravitation

- universal law
- g variation with altitude/depth
- Kepler
- gravitational potential/energy
- escape velocity
- satellites
- orbital velocity
- period
- energy

Properties of Solids and Liquids

- elasticity
- stress/strain
- Hooke law
- Young/bulk/rigidity moduli
- pressure
- Pascal law
- viscosity
- Stokes
- terminal velocity
- streamline/turbulent
- Bernoulli
- surface tension
- capillary rise
- heat
- expansion
- specific heat
- calorimetry
- phase change
- latent heat
- conduction
- convection
- radiation

Thermodynamics

- thermal equilibrium
- temperature
- zeroth law
- heat
- work
- internal energy
- first law
- isothermal
- adiabatic
- second law
- reversible/irreversible

Kinetic Theory of Gases

- perfect-gas equation
- compression work
- assumptions
- pressure
- kinetic temperature
- RMS speed
- degrees of freedom
- equipartition
- specific heats
- mean free path
- Avogadro number

Oscillations and Waves

- periodic motion
- time period
- frequency
- SHM
- phase
- spring
- SHM energy
- pendulum
- waves
- longitudinal/transverse
- progressive waves
- superposition
- reflection
- standing waves
- strings
- organ pipes
- harmonics
- beats

Electrostatics

- charge/conservation
- Coulomb
- multiple charges
- superposition
- continuous distribution
- field
- field lines
- dipole
- torque
- flux
- Gauss law
- line/plane/spherical shell
- potential
- potential difference
- equipotential
- potential energy
- conductors
- dielectrics
- polarisation
- capacitance
- capacitor combinations
- parallel plate
- dielectric
- energy

Current Electricity

- drift velocity
- mobility
- Ohm law
- resistance
- I-V
- energy/power
- resistivity/conductivity
- resistor combinations
- temperature dependence
- internal resistance
- potential/EMF
- cells
- Kirchhoff
- Wheatstone
- metre bridge

Magnetic Effects of Current and Magnetism

- Biot-Savart
- circular loop
- Ampere
- straight wire
- solenoid
- Lorentz force
- current conductor
- parallel currents
- ampere definition
- torque
- galvanometer
- sensitivity
- ammeter/voltmeter
- magnetic dipole
- bar magnet
- axis/perpendicular-axis fields
- magnetic materials
- temperature

Electromagnetic Induction and Alternating Currents

- Faraday
- induced EMF/current
- Lenz
- eddy currents
- self/mutual inductance
- AC peak/RMS
- reactance
- impedance
- LCR
- resonance
- power
- wattless current
- generator
- transformer

Electromagnetic Waves

- displacement current
- properties
- transverse nature
- spectrum from radio to gamma
- applications

Optics

- reflection
- spherical mirrors
- mirror formula
- refraction
- thin lens
- lens maker
- TIR
- magnification
- power
- lens combinations
- prism
- microscope
- telescope
- wavefront
- Huygens
- interference
- Young double-slit
- fringe width
- coherence
- diffraction
- central maximum
- polarisation
- Brewster
- Polaroids

Dual Nature of Matter and Radiation

- dual nature
- photoelectric effect
- Hertz/Lenard observations
- Einstein equation
- particle nature
- matter waves
- de Broglie

Atoms and Nuclei

- alpha scattering
- Rutherford
- Bohr
- energy levels
- hydrogen spectrum
- nuclear composition/size
- atomic masses
- mass-energy
- mass defect
- binding energy
- fission
- fusion

Electronic Devices

- semiconductors
- diode I-V
- rectifier
- LED
- photodiode
- solar cell
- Zener
- voltage regulator
- OR/AND/NOT/NAND/NOR

Experimental Skills

- vernier
- screw gauge
- pendulum
- metre scale moments
- Young modulus
- surface tension
- viscosity
- sound resonance tube
- specific heat
- metre bridge
- Ohm law
- galvanometer
- focal length
- prism deviation
- refractive index
- p-n junction
- Zener
- component identification

Chemistry

Some Basic Concepts in Chemistry

- matter
- Dalton
- atom/molecule/element/compound
- laws of combination
- atomic/molecular mass
- mole
- molar mass
- percentage composition
- empirical/molecular formula
- equations
- stoichiometry

Atomic Structure

- EM radiation
- photoelectric effect
- H spectrum
- Bohr
- energy/radius
- limits

Solutions

- molality
- molarity
- mole fraction
- percentage
- vapour pressure
- Raoult
- ideal/non-ideal
- colligative properties
- molar mass
- abnormal values
- van't Hoff factor

Equilibrium

- physical equilibrium
- Henry law
- chemical equilibrium
- mass action
- Kp/Kc
- Gibbs relation
- factors
- Le Chatelier
- weak/strong electrolytes
- acid/base theories
- ionisation
- pH
- common ion
- hydrolysis
- Ksp
- buffers

Redox Reactions and Electrochemistry

- oxidation/reduction
- oxidation number
- balancing
- conduction
- molar conductivity
- Kohlrausch
- electrolytic/galvanic cells
- electrode potentials
- EMF
- Nernst
- Gibbs relation
- dry cell
- lead accumulator
- fuel cell

Chemical Kinetics

- rate
- concentration/temperature/pressure/catalyst effects
- elementary/complex
- order
- molecularity
- rate law
- zero/first order
- half-life
- Arrhenius
- activation energy
- collision theory

Classification and Periodicity

- modern periodic law
- table
- electronic configuration
- atomic/ionic radius
- ionisation enthalpy
- electron-gain enthalpy
- valence
- oxidation state
- electronegativity
- reactivity

Hydrogen

- position
- occurrence
- isotopes
- preparation
- properties
- uses
- hydrides
- water
- heavy water
- hydrogen peroxide
- fuel

s-Block Elements

- Groups 1/2
- trends
- compounds
- reactions

p-Block Elements

- Groups 13-18
- configuration
- trends
- compounds
- reactions

d- and f-Block Elements

- transition elements
- oxidation states
- complexes
- catalysis
- magnetic behaviour
- lanthanoids
- actinoids
- applications

Coordination Compounds

- Werner
- terminology
- nomenclature
- isomerism
- bonding
- stability
- applications

Organic Chemistry Principles

- IUPAC
- structural/stereo isomerism
- purification
- analysis
- electronic effects
- intermediates
- reaction types

Hydrocarbons

- alkanes
- alkenes
- alkynes
- aromatic hydrocarbons
- preparation
- reactions

Organic Compounds Containing Halogens

- haloalkanes
- haloarenes
- C-X bond
- preparation
- substitution
- elimination
- polyhalogen compounds

Alcohols Phenols and Ethers

- classification
- nomenclature
- preparation
- physical properties
- reactions
- phenol acidity
- ethers
- uses

Aldehydes Ketones and Carboxylic Acids

- nomenclature
- carbonyl structure
- preparation
- physical properties
- reactions
- carboxylic acid structure
- preparation
- properties
- reactions
- uses

Amines

- structure
- classification
- nomenclature
- preparation
- properties
- reactions
- diazonium salts
- synthesis use

Biomolecules and Polymers

- carbohydrates
- proteins
- enzymes
- vitamins
- nucleic acids
- polymers

Biology

Diversity in Living World

- living world
- taxonomy
- biological classification
- plant kingdom
- animal kingdom

Structural Organisation

- morphology and anatomy of flowering plants
- tissues
- animal organisation

Cell Structure and Function

- cell
- organelles
- biomolecules
- membrane
- cell cycle
- mitosis
- meiosis

Plant Physiology

- transport
- mineral nutrition
- photosynthesis
- respiration
- plant growth and development

Human Physiology

- breathing
- circulation
- excretion
- locomotion
- neural control
- chemical coordination

Reproduction

- flowering-plant reproduction
- human reproduction
- reproductive health

Genetics and Evolution

- inheritance
- molecular basis
- DNA/RNA
- replication
- transcription
- translation
- evolution

Biology and Human Welfare

- health/disease
- microbes in human welfare
- immunity
- human welfare applications

Biotechnology

- recombinant DNA
- genetic engineering
- health/agriculture applications
- biosafety

Ecology and Environment

- organisms/environment
- population interactions
- ecosystem
- biodiversity
- conservation
- environmental issues

JEE Advanced 2026

Mathematics

Sets, Relations and Functions

- sets
- relations
- functions
- composition

Algebra

- complex numbers
- quadratic equations
- sequences/series
- binomial
- permutations/combinations
- matrices/determinants

Trigonometry

- identities
- equations
- inverse functions

Coordinate Geometry

- straight lines
- circles
- conics
- 3D

Differential Calculus

- limits
- continuity
- differentiability
- applications

Integral Calculus

- indefinite/definite integration
- area
- differential equations

Probability and Statistics

- probability
- conditional probability
- Bayes
- statistics

Vectors

- vector operations
- applications

Physics

General Physics

- units
- dimensions
- errors
- significant figures
- vectors

Mechanics

- kinematics
- Newton laws
- friction
- work-energy
- momentum
- centre of mass
- rotation
- gravitation
- fluids

Thermal Physics

- thermal expansion
- calorimetry
- heat transfer
- thermodynamics
- kinetic theory

Waves and Oscillations

- SHM
- waves
- sound
- standing waves
- beats

Electromagnetism

- electrostatics
- current electricity
- magnetism
- EMI
- AC

Optics

- geometrical optics
- interference
- diffraction
- polarisation

Modern Physics

- photoelectric effect
- atoms
- nuclei
- radioactivity
- semiconductors

Chemistry

General Topics

- atoms/molecules
- Dalton theory
- mole concept
- formulae
- balanced equations
- stoichiometry
- mole fraction
- molarity
- molality
- normality

States of Matter: Gases and Liquids

- gas laws
- ideal gas
- van der Waals
- kinetic theory
- average/RMS/most probable speeds
- partial pressures
- diffusion
- intermolecular interactions
- vapour pressure
- surface tension
- viscosity

Atomic Structure

- Bohr
- H spectrum
- de Broglie
- uncertainty
- quantum numbers
- wave function
- probability density
- orbital shapes
- Aufbau
- Pauli
- Hund

Chemical Bonding

- orbital overlap
- covalent bond
- hybridisation
- MO diagrams up to Ne2
- hydrogen bond
- polarity/dipole moment
- VSEPR

Thermodynamics

- intensive/extensive
- state functions
- first/second laws
- internal energy
- PV work
- heat
- enthalpy
- Hess law
- entropy
- Gibbs
- equilibrium/spontaneity

Chemical and Ionic Equilibrium

- mass action
- Kp/Kc
- reaction quotient
- Le Chatelier
- Ksp
- common ion
- pH
- buffers
- Brønsted/Lewis acids/bases
- hydrolysis

Electrochemistry

- cells
- standard potentials
- Nernst
- electrochemical series
- Faraday laws
- conductance
- Kohlrausch
- batteries
- fuel cells
- corrosion

Chemical Kinetics

- rates
- order
- molecularity
- rate law
- half-life
- zero/first order
- Arrhenius
- activation energy
- catalysis

Solid State

- crystalline state
- seven systems
- unit-cell parameters
- close packing
- FCC/BCC/HCP
- defects

Solutions

- Henry
- Raoult
- ideal solutions
- colligative properties
- van't Hoff factor

Surface Chemistry

- physisorption
- chemisorption
- Freundlich
- colloids
- emulsions
- surfactants
- micelles

Periodicity and Blocks

- periodic law
- configuration
- radius
- ionisation enthalpy
- electron-gain enthalpy
- valence
- oxidation states
- electronegativity
- s/p/d/f blocks

Hydrogen

- position
- isotopes
- preparation
- properties
- hydrides
- water
- hydrogen peroxide
- fuel

Coordination Chemistry

- ligands
- coordination number
- nomenclature
- isomerism
- bonding
- stability
- applications

Organic Chemistry

- nomenclature
- isomerism
- mechanisms
- hydrocarbons
- halogen compounds
- alcohols/phenols/ethers
- carbonyls
- carboxylic acids
- amines
- biomolecules/polymers
